

Friday of joy initiative's program

We are the team of Friday of Joy initiative represented of Palestine Trauma Center, where we provide recreational activities in camps in the Gaza Strip, through the provision of play sketches and competitions to alleviate the suffering of children in the Gaza Strip.

According to the request of the parents through their contact on the Face book page, we have responded to the appeal of the child Mohammed Al-Lahham who is suffering from dialysis.

Father of the child Mohamed Lahham

Mohammed is a 10-years old, he is suffering from kidney failure. Mohammed is washing his kidneys three times a week in Dr. Abdul Aziz Al-Rantisi Hospital in Gaza City.

During this period, Mohammed was exposed to 13 or 14 surgeries.

Question from the father to his son Mohammed:

Father: What are you doing when you go for dialysis?

Mohammed: They put the needles.

Father: Where they put the needles? In your hand? Ok? Where do you feel pain?

The father of Mohammed:

In the hospital, the two clowns Allosh and Marush come to the dialysis department, they raise morale at children and can take them out of diseases feelings.
